

13-03-P Questions and Answers

1. Is a complete SF330 Parts I and II required for all sub-consultants as well as the prime consultant?

Yes

2. The proposal requests three recently performed, relevant projects within the past five years that indicate past experiences and abilities of the proposed team, as well as client contact. Are these three relevant projects counted towards the page count?

The three relevant projects are not counted towards the 25 pages as stated on page 2 of the "scope of work". It would be best to put the information on the relevant projects in their own labeled, divided section. It will not, however, count against the 25 pages no matter where they are included.
