Eligibility

The following eligibility statement is taken from the Public Employee Benefit Authority's 2014 Insurance Benefits Guide (page 68)

Routine mammograms are covered at 100 percent for State Health Plan Standard and Savings Plan subscribers, as long as you use a provider that is in the mammography network and you meet eligibility requirements.

Mammography benefits include:

- One base-line mammogram (4 views) for women age 35 through 39
- One routine mammogram (4 views) every year for women age 40 through 74

Charges for routine mammograms performed at nonparticipating facilities are not covered, with the exception of procedures performed outside South Carolina. Out-of-network providers are free to charge you any price for their services, so you may pay more.

Preventive mammogram benefits are in addition to benefits for diagnostic mammograms. Any charges for additional mammograms are subject to deductibles and coinsurance.

Women, age 40 and older, covered as retirees and enrolled in Medicare, should contact Medicare or see Medicare and You 2014 for information about coverage. The State Health Plan is primary for a women covered as active employee or as the spouse of an active employee, regardless of Medicare eligibility.
